REPORT OF THE TREE WARDEN

One hundred eight trees were cut and removed from public ways, due to them being hazardous or damaged, to the point they could not be saved. Several trees that were blocking streets were removed. This was accomplished with the cooperation of the Monson Highway Department personnel and equipment. Tree stumps were ground and removed from tree belts on various streets, with those areas loamed and seeded. Maintenance and trimming of healthy trees continued as usual. A special thanks to Northern Tree Service for their assistance, as needed.

In 2016 the duties of the tree warden were split, as John Morrell’s term ended on June 30, 2016, and Ben Murphy became the new tree warden, as of July 1, 2016. Ben was appointed tree warden for a three year term. Ben has been doing a great job and the transition has worked out well.

Respectfully submitted,

John Morrell
Tree Warden

Ben Murphy
Tree Warden
